

grafica aperta

gli strumenti e le communities

i software di grafica 2D
le possibilità di pubblicazione
le gallerie free
i software di pubblicazione
due esempi concreti
gli sviluppi futuri

**questo non è un
seminario tecnico.**

i software di grafica 2D.

- la grafica può dividersi in due macrocategorie
 - RASTER
 - VETTORIALE

Grafica RASTER

- Rozzamente la grafica raster è quella che ha bisogno di un quadro diviso in unità elementari (pixel sul pc) e porta informazioni di colore per ognuna di queste unità.

Grafica RASTER

- Tanto più pesante quanto grande e/o complessa è la rappresentazione dell'immagine stessa.
- Non è ridimensionabile a piacere senza perdita di qualità (informazione)
- **FORMATI: TIFF, JPEG, GIF, PNG, PSD, XCF...**

Grafica VETTORIALE

- Definisce i propri oggetti non sulla base di unità elementari ma su informazioni intrinseche dell'oggetto stesso.
ES: per descrivere un cerchio gli bastano il valore della circonferenza e lo “spessore” del bordo.

Grafica VETTORIALE

- È molto leggera (in genere) perché porta un sottoinsieme di informazioni rispetto ai raster
- È ridimensionabile a piacere senza perdita di informazione alcuna
- FORMATI: AI, EPS, SVG...

Raster o Vector?

- È un problema inesistente.
- entrambe hanno un utilizzo per alcuni scopi particolari
es: per rendere una fotografia in tutti i propri dettagli, non è molto sensato usare grafica vector. Per descrivere forme geometriche non ha molto senso usare forme raster.

l'eccezione web.

- Per la pubblicazione su siti di immagini, si preferisce in genere l'uso di un formato di “output” raster.
- alcuni browsers non supportano nativamente i formati vettoriali nativi (SVG != Internet Explorer)
- HTML 5 è una speranza per il mondo :)
- SVG+JS possono usare la magia del DOM e avere interazioni 2.0 con grafica vettoriale anche su web

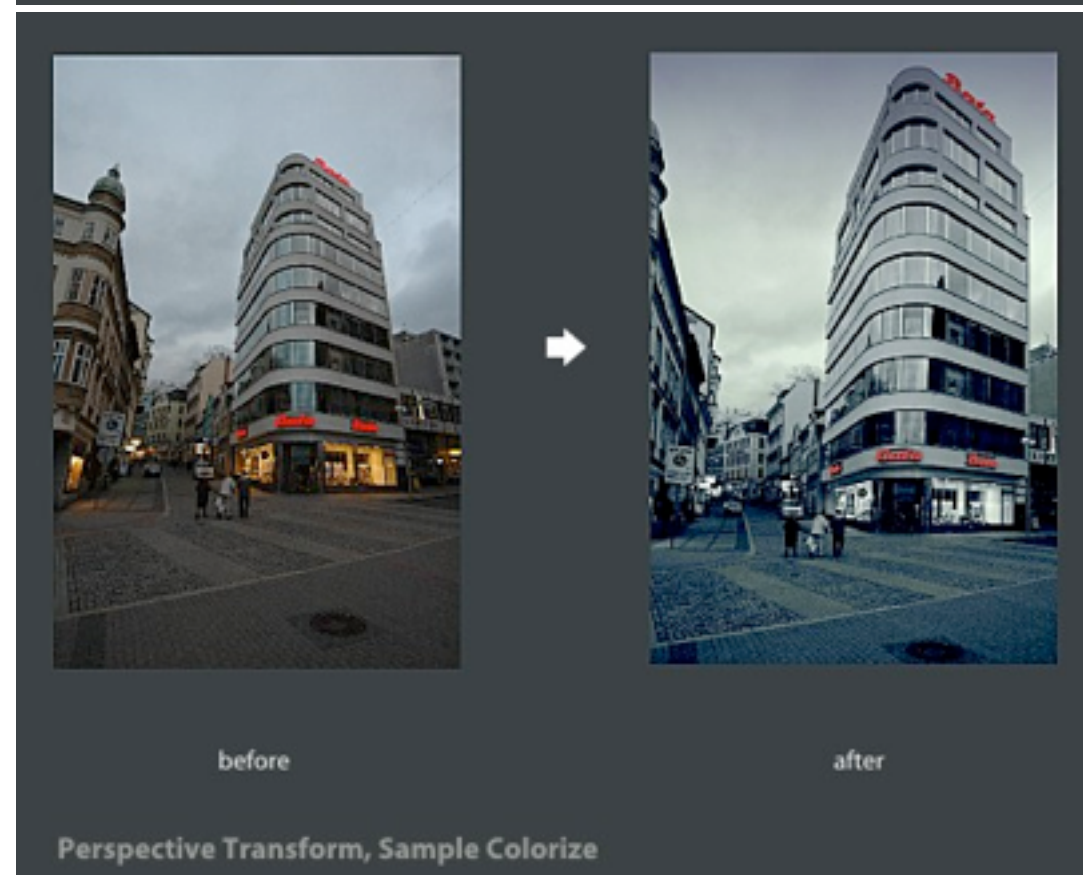

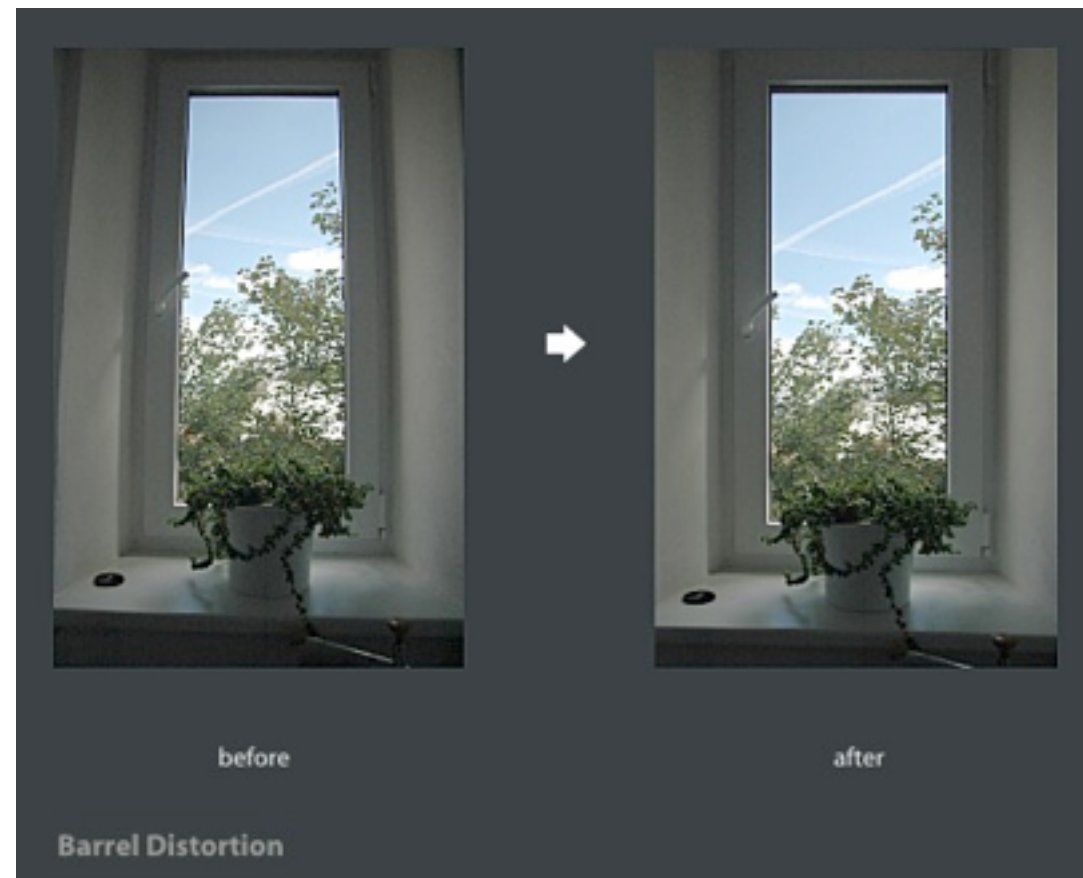

grafica raster

- molti software proprietari.
è praticamente diventato standard Photoshop.
- alcuni software liberi validi

The Gimp

- caratteristiche principali
 - interfaccia customizzabile
 - miglioramenti fotografici
 - ritocco digitale
 - hardware support

alcuni esempi

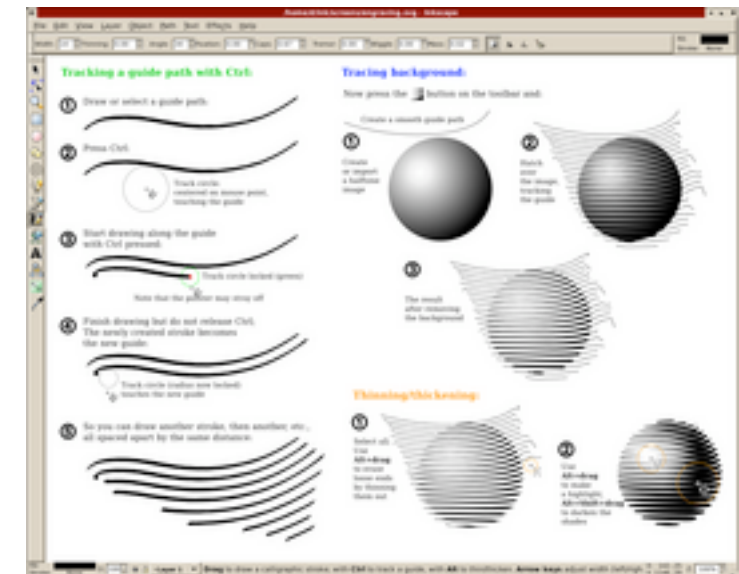

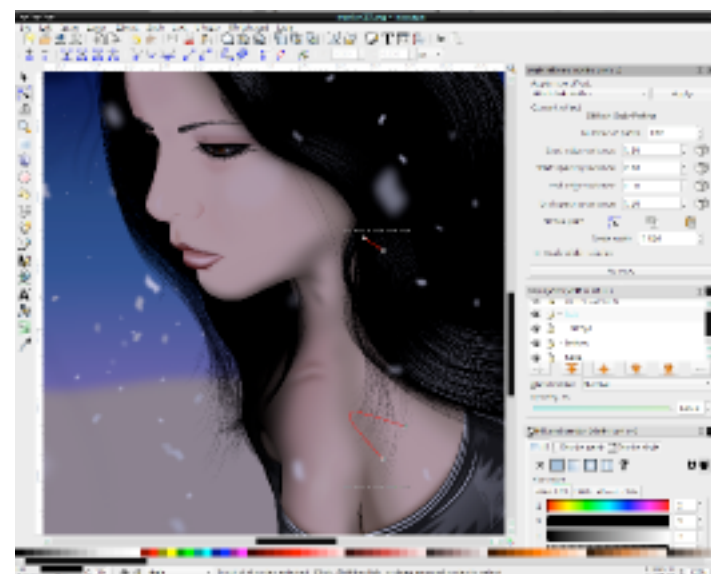

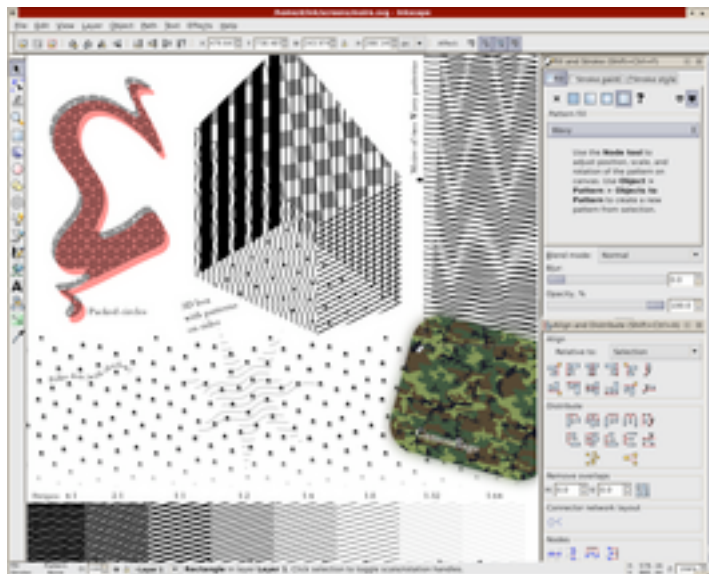

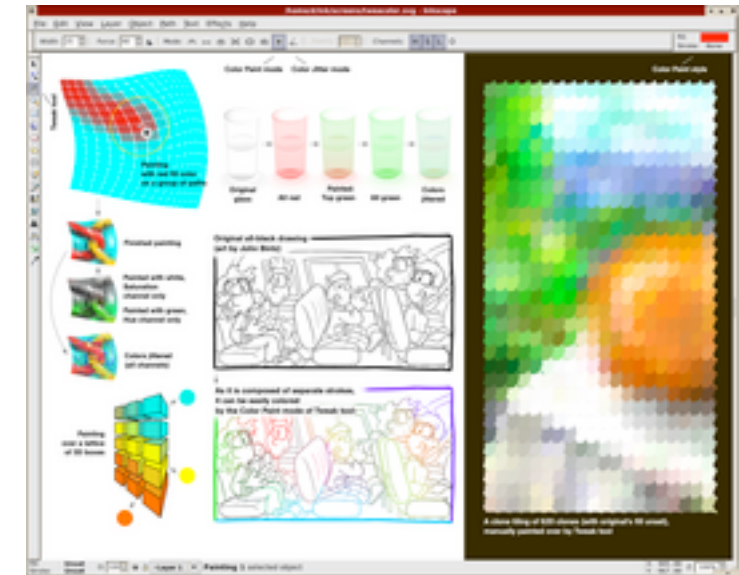

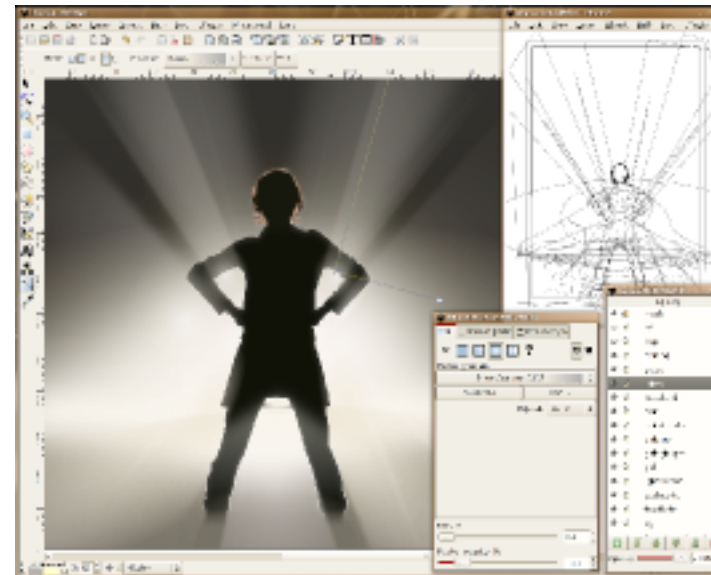

grafica vector

- molti software proprietari.
è praticamente diventato standard
Illustrator o per i più vetero Freehand.
- un software libero molto valido

Inkscape

- caratteristiche principali
 - usa un formato w3c valid (albero xml)
 - gestione curve vettoriali Tweak tool
 - lighting effects (gaussian blur)

alcuni esempi

ho creato, sono un
artista e ora?

pubblicare e farsi vedere

- molti artisti scelgono di pubblicare su vari strumenti 2.0 per condividere le proprie opere con gli utenti.
es: inkscapers.deviantart.com

dove?

dove capita...

- flickr
- deviantart
- blog personali
- social networks

è male?

- è nell'interesse dell'artista farsi vedere
- è nell'interesse++ dell'artista poter scegliere come pubblicare.
- licenze

il valore dei luoghi

- pubblicare su Flickr, Deviant Art, Blogs, Social networks ha il merito di rendervi visibili, ma non sottolinea una peculiarità.
- Non emerge che le vostre opere sono state fatte con software libero.

i Gallery.

- per questo motivo nel 2008 sono stati rilasciati due portali che riorganizzano i materiali sparsi per la rete.
- Inkscapegallery
- Gimpgallery
- sono progetti completamente no-profit realizzati per chi usa questi software.

Inkscapegallery

- basato su Drupal 5, e una serie di moduli custom.
- è stato realizzato da un webdesigner senza sviluppatori

WELCOME IN INKSCAPE GALLERY!

This is not a simple art gallery website. This is an art gallery website made by inkscape users for inkscape users. Inkscape is an open-source vector graphics editor. We hope this would be the best inkscape experience for you, if you already know it, and the best place to show your artworks too... Start browsing this site, use inkscape and join us posting your drawings here!

ENTER THE WEBSITE

You will enter the web-site from
the front door, Contents are paged
and you will see web.design drawing
and graphic drawing together.

RECENTLY

Wow, i use inkscape.
May i post my works
here?

would you like to be
one of them?

Hello, welcome to the gimp gallery website. This is meant as a powerful image gallery website for the gimp users community and for the open-source community too, but there's something more... You'll find useful informations, tutorials, two forums, js slideshow and more. This is a web-design experiment too, you see here a try to include some advanced js in a dynamic website, where the contents are posted by the users. We hope you to like it, if you do take a look to the "promote us" section, maybe you have a website or a blog where to show a link to us. Thank you!

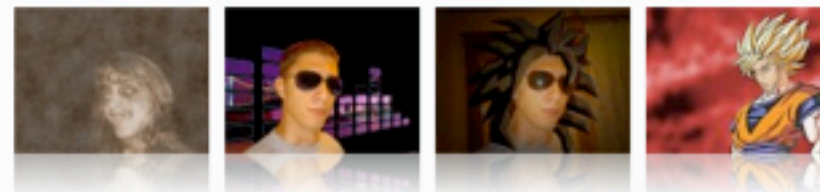

QUICKSTART

ENTER THE WEBSITE

Here you will jump directly in the earth of the website where you will see the galleries of gimp made images and animations.

GIMP.ORG NEWS

GIMP 2.4.7 RELEASED

GIMP 2.4.7 is a bug-fix release in the stable 2.4 series. Please see the [NEWS](#) file for a list of changes. The source can be downloaded from [ftp.gimp.org](ftp://ftp.gimp.org).

GIMP 2.5.4 DEVELOPMENT RELEASE

GIMP approaches the next stable release and only a handful bugs are left to be fixed before GIMP 2.6 is ready. If you want to give the GIMP 2.5.4 development snapshot a try, please have a look at the

GIMP 2.6.3 RELEASED

GIMP 2.6.3 is another bug-fix release in the stable GIMP 2.6 series. For a list of changes, please check the [NEWS](#) file. The source can be downloaded from [ftp.gimp.org](ftp://ftp.gimp.org).

GIMP USERS

NEWS: FIRST WINDOWS BUILD FOR GIMP 2.5 AVAILABLE!

Windows users should be happy today! A first unstable development release of GIMP 2.5 is now available for the Windows operating system!

NEWS: GIMP 2.5.3 DEVELOPMENT SNAPSHOT RELEASED

Today the GIMP developers released the (probably) last version in the 2.5-development branch: 2.5.3 offer lots of new features and improvements.

NEWS: GIMP 2.4.7 RELEASED

A bugfix release for the stable GIMP 2.4 has been released.
